

Variety name	Weight in oz.	Standard	Mini tubers	Micro tubers	Tuber total	Set Level	Bag Color
--------------	------------------	----------	----------------	-----------------	----------------	--------------	--------------

This file reports on potato varieties grown during the 2011 season in SmartBags, organized by yields size, with number of tubers [mini are "chestnut size" up to 1 oz. - and micro are "hazelnut" to smaller than a pea]. The codes S - AS - WAS in the SetLevel Column are for Surface [found tubers just below the soil surface] Above Surface [tuber found at 12" above the seed piece, or over soil surface], WAS for way above surface [usually micro tubers attached to the vine "way" above soil level]; the bag color is likely to change the aver. soil temperature. In 2011 all bags were 14" tall.
