

Variety name	Weight in oz.	Standard	Mini tubers	Micro tubers	Tuber total	Set Level	Bag Color
This file reports on potato varieties grown during the 2011 season in SmartBags, organized by yields size, with number of tubers [mini are "chestnut size" up to 1 oz. - and micro are "hazelnut" to smaller than a pea]. The codes S - AS - WAS in the SetLevel Column are for Surface [found tubers just below the soil surface] Above Surface [tuber found at 12" above the seed piece, or over soil surface], WAS for way above surface [usually micro tubers attached to the vine "way" above soil level]; the bag color is likely to change the aver. soil temperature. In 2011 all bags were 14" tall.
